

Who is user?

Primary:

- Employee

Secondary:

- Supervisor
- Mentor
- HR

Design the leadership portfolio page like a pitch deck, not like a dashboard

Components:

V1 = Operator

V2 = Manager

V3 = Program Lead

V4 = Strategic Director

V5 = Mandate Setter (Sets goals)

KPI = shared program metrics

IP = original work

Deliverables = units of work shipped.

(only "delivered" counts for scoring)

Constraints = Blockers

Career Runrate = career progression score

Metric → Story

What is a question employee would want answered?

Am I improving?

then: What should I improve next?

Sections:

*** Executive summary → gives verdict
Keep → best as a one liner

*** Contribution highlights → Evidence
Keep → Justification to mentor
→ Useful for future IVs

*** Capability growth → shows trajectory
Keep → affects promotion

* KPI impact → operational metric
Keep as → can be collapsed into a short narrative & rest of the info as "Read More"

***Constraint patterns → Somewhat useful
Keep lower down → Rename to "Challenges overcome"

***Career trajectory → Future oriented
Keep → v. imp. for growth perspective

Sample Hierarchy

"Strongest month since joining"

What caused this improvement

Career projection

Main growth gap

Contribution gap

2 options to approach the problem:

Strong month
↓
Growth gap
↓
Promotion Projection

or

Strong month
↓
Promotion projection
↓
Growth gap

better option

Why?

Career projection is shown before growth gaps because the projection provides context for why the gap matters. Employees are more likely to engage with improvement areas when they understand the future outcome attached to them. Showing the gap immediately after the projection, transform it from a criticism into an actionable step.

Leaves a more lasting impact on what should be worked on next.

Sample User

Ranjan Iyer

Current portfolio Metrics:

composite score: 71

previous score: 64

current level: V2

projected level: V3

Deliverables completed: 16/20

IP contributions: 7

KPI targets hit: 3/5

Framework score: 52

Required threshold: 60

Constraints raised: 8

Constraints resolved: 5

Observations:

Strongest month since joining
Score improved significantly
Ahead of planned v3 trajectory
Framework score is the primary blocker
High contribution volume
KPI details are useful but too operational

Final Wireframe:

Ranjan Iyer

Production Planning Lead

March 2026 Portfolio

Current level: v2

Strongest month since joining

+7 score improvement

Ahead of plan

Monthly growth summary (2-3 line narrative)

→ Reason:

First answer the user's
biggest question
"Am I improving?"

Key Contributions & Impact

- 16 deliverables
 - 7 original contributions
 - Top achievement
- [View all contributions]

Reason:

shows why this month
successful & provides
career evidence

Career Outlook

current level: v2

Projected level: v3

Promotion timeline

Next Growth Area

Framework application

Current score vs threshold

Recommended Focus areas

→ Reason:
Provides actionable
steps

Additional insights

KPI Impact summary
[view KPI details]

Challenges & Learnings
[view details]

→ Reason:
Supporting information
that should not dominate
the main narrative

Design Decision 1 - Growth-focused hero section
instead of score-focused

Reason:

Employees primarily want to know whether they are improving.

∴ The portfolio starts with a growth summary rather than a collection of metrics

Design Decision 2 - Contribution highlights remain visible

Reason:

Contributions act as career evidence and help mentors understand the employee's impact beyond numerical scores.

Design Decision 3 - KPI and constraint details are collapsed into summaries

Reason:

Detailed operational metrics interrupt the career narrative. A summary with expandable details preserves information while reducing cognitive overload.

Reading flow:
